Tactical Plan

Fiscal Year 2008

Introduction

The Missouri University of Science and Technology Strategic Plan defines the University's mission and vision of achievement while embracing its land- and space-grant heritage and responsibility. The objectives and goals of the Strategic Plan identify specific areas of interest or improvement that are in concert with the mission and vision. The specific actions to be taken to achieve the goals and objectives that will allow Missouri S&T to realize its vision and execute its mission are identified in the Tactical Plan. While all goals and objectives are important, it is recognized that not all goals and objectives can be pursued and achieved simultaneously. Some goals and objectives must be completed before others can begin while some must be phased in because of resource limitations, timing, or duration of effort required. Thus, developing this annual Tactical Plan of accomplishment defines how specifically we will move toward each of the four strategic objectives in the Strategic Plan. Specific officers, individuals, or leaders are designated as being responsible for ensuring that a team of university members, faculty, staff, administrators, students, alumni, and friends are properly organized and led to accomplish a specific action taken in support of a goal or objective.

As each goal has a progress or continuous improvement measurement associated with it, each activity also has a corresponding metric. At the end of each 12-month period of the Tactical Plan, the various activities are measured and success is evaluated. Those activities, goals, and objectives that are achieved are acknowledged and celebrated. Those activities, goals, and objectives that weren't completely or satisfactorily completed or achieved are modified or extended to ensure that they can be achieved and they will continue to be pursued in the next annual Tactical Plan. As resources become available, additional objectives, goals, and their associated activities are added to the next year's tactical plan. Each year's Tactical Plan will be constructed so the Strategic Plan's objectives and goals are reviewed and updated to ensure progress toward the University's vision.

The Chancellor will report annually to the campus community on the success of the Tactical Plan and the progress made on the strategic objectives.
