External Functions and Activities Planning Committee

The External Functions and Activities Planning Committee will identify those activities and functions involving fund-raising, outreach, and relations with individuals, organizations, and companies external to the university that are currently beneficial to the university and may continue to provide benefit to the University in the future. After identifying all external activities of benefit to the University, make recommendations regarding which activities should continue where they are currently assigned or be reassigned to the new vice provost and deans’ offices and make further recommendations regarding which university unit, if not the VDP’s, should assume the responsibility for ensuring that these activities are successfully continued.
